

江戸時代の設計図

I'm going to talk about the ruins of Sekiyado Castle.

I went to see the ruins of Sekiyado Castle by bike this Thursday.

Sekiyado Castle was built more than 500 years ago.

The first lord was Tokugawa Ieyasu's brother.

And the castle tower rebuilt in 1671.

Then it was torn down in the early Meiji period.

Now the summer grasses are growing thickly.

By the way this is the plan of the Sekiyado Castle.

It's about 15.19 meters tall.

Sekiyado Castle museum is near the ruins of the castle.

It's so beautiful in the rainy season.

Thank you for listening.
